WELSH & KATZ, LTD 120 S RIVERSIDE PLAZA 22ND FLOOR CHICAGO, IL 60606			WARD, JOHN A	
			ART UNIT	PAPER NUMBER
			2875	

DATE MAILED: 02/22/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/614,583	<b>Applicant(s)</b> PARSONS, KEVIN L.	
	<b>Examiner</b> John A. Ward	<b>Art Unit</b> 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 12 December 2005.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 48-77 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 48-77 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 48-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz (US 3,259,428) in view of Tabor (US 5,386,351) and in view of Dalton et al (US 6,070,990).

Regarding claim 48, Swartz ('428) discloses a miniature flashlight having a light source 26 having a first lead; second lead extending therefrom and a power source 37 having a first and second side. A housing 34, including a first cover 22, second 23 and a switch 30 operable to closes a circuit of the flashlight (figure 7).

Regarding claim 49, Swartz shows in figure 2 how the first and second cover is adjacent the power source on opposing sides of the power source.

Regarding claim 50, Swartz in figure 2 that the first and second covers have a generally flat shape in cross section that generally parallels a flattened cross section of the power source in an elongated direction of the flashlight.

Regarding claim 53, column 2, and lines 16-31 teaches that the housing and side's covers can be made of any material.

Regarding claim 48, Swartz does not disclose the light source being a light emitting diode.

Regarding claim 48, Tabor ('351) discloses a flashlight having first and second cover 14, 16, a light emitting diode 24 having first lead 26 and second lead 28, a power supply being that of a battery 20 located between both leads of the light emitting diode.

Regarding claims 51, 52 and 54-59, neither Swartz nor Tabor discloses the side covers having different colors, marking or indicia.

Regarding claims 51, 52 and 54-59 Dalton et al ('990) discloses a card light having a cover having a light emitting diode 36, a battery 30, a first cover 12 and a second cover 20 having a decorative indicia.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the housing of a decorative colors or markings on the side housing of the cover of the flashlight in order to provide a pleasing decorative flashlight for use with company logos, promotional advertisement or special occasions.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the flashlight of Swartz having the first and second side covers with the flashlight having a light emitting diode of Tabor and the

decorative cover of Dalton et al in order to provide a flashlight that is light weight and have a light source that will last a longer amount of time over that of conventional incandescent lamps.

Claims 60-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz (US 3,259,428) in view of Tabor (US 5,386,351) and in view of Dalton et al (US 6,070,990).

Regarding claim 60, Swartz ('428) discloses a miniature flashlight having a light source 26 having a first lead; second lead extending therefrom and a power source 37 having a first and second side. A power source frame 34, including a first cover 22, second 23 and a switch 30 operable to closes a circuit of the flashlight (figure 7).

Regarding claim 61, Swartz shows in figure 2 how the first and second cover is adjacent the power source on opposing sides of the power source.

Regarding claim 62, Swartz in figure 2 that the first and second covers have a generally flat shape in cross section that generally parallels a flattened cross section of the power source in an elongated direction of the flashlight.

Regarding claim 65, column 2, and lines 16-31 teaches that the housing and side's covers can be made of any material.

Regarding claim 60, Swartz does not disclose the light source being a light emitting diode.

Regarding claim 60, Tabor ('351) discloses a flashlight having first and second cover 14, 16, a light emitting diode 24 having first lead 26 and second lead 28, a power supply being that of a battery 20 located between both leads of the light emitting diode.

Regarding claims 63, 64 and 66-71, neither Swartz nor Tabor discloses the side covers having different colors, marking or indicia.

Regarding claims 63, 64 and 66-71, Dalton et al ('990) discloses a card light having a cover having a light emitting diode 36, a battery 30, a first cover 12 and a second cover 20 having a decorative indicia.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the housing of a decorative colors or markings on the side housing of the cover of the flashlight in order to provide a pleasing decorative flashlight for use with company logos, promotional advertisement or special occasions.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the flashlight of Swartz having the first and second side covers with the flashlight having a light emitting diode of Tabor and the decorative cover of Dalton et al in order to provide a flashlight that is light weight and have a light source that will last a longer amount of time over that of conventional incandescent lamps.

Claim 72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz (US 3,259,428) in view of Tabor (US 5,386,351) and in view of Dalton et al (US 6,070,990).

Regarding claim 72 Swartz ('428) discloses a miniature flashlight having a light source 26 having a first lead; second lead extending therefrom and a power source 37 having a first and second side. A housing 34, including a first cover 22, second 23 and a switch 30 operable to closes a circuit of the flashlight (figure 7).

Swartz shows in figure 2 that the first and second covers have a generally flat shape in cross section that generally parallels a flatted cross section of the power source in an elongated direction of the flashlight.

Regarding claim 72, Swartz does not disclose the light source being a light emitting diode.

Regarding claim 72, Tabor ('351) discloses a flashlight having first and second cover 14, 16, a light emitting diode 24 having first lead 26 and second lead 28, a power supply being that of a battery 20 located between both leads of the light emitting diode.

Regarding claims 72, neither Swartz nor Tabor discloses the side covers having different colors.

Regarding claim 72, Dalton et al ('990) discloses a card light having a cover having a light emitting diode 36, a battery 30, a first cover 12 and a second cover 20 having a decorative indicia.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the housing of a decorative colors or markings on the side

Art Unit: 2875

housing of the cover of the flashlight in order to provide a pleasing decorative flashlight for use with company logos, promotional advertisement or special occasions.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the flashlight of Swartz having the first and second side covers with the flashlight having a light emitting diode of Tabor and the decorative cover of Dalton et al in order to provide a flashlight that is light weight and have a light source that will last a longer amount of time over that of conventional incandescent lamps.

Claims 73-77 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz (US 3,259,428) in view of Tabor (US 5,386,351) and in view of Dalton et al (US 6,070,990).

Regarding claim 73 Swartz ('428) discloses a miniature flashlight having a light source 26 having a first lead; second lead extending therefrom and a power source 37 having a first and second side. A housing 34, including a first cover 22, second 23 and a switch 30 operable to closes a circuit of the flashlight (figure 7).

Regarding claim 74 and 75, Swartz shows in figure 2 that the first and second covers have a generally flat shape in cross section that generally parallels a flattened cross section of the power source in an elongated direction of the flashlight.

Regarding claim 73, Swartz does not disclose the light source being a light emitting diode.

Regarding claim 73, Tabor ('351) discloses a flashlight having first and second cover 14, 16, a light emitting diode 24 having first lead 26 and second lead 28, a power supply being that of a battery 20 located between both leads of the light emitting diode.

Regarding claims 76 and 77, neither Swartz nor Tabor discloses the side covers having different colors.

Regarding claims 76 and 77, Dalton et al ('990) discloses a card light having a cover having a light emitting diode 36, a battery 30, a first cover 12 and a second cover 20 having a decorative indicia.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the housing of a decorative colors or markings on the side housing of the cover of the flashlight in order to provide a pleasing decorative flashlight for use with company logos, promotional advertisement or special occasions.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the flashlight of Swartz having the first and second side covers with the flashlight having a light emitting diode of Tabor and the decorative cover of Dalton et al in order to provide a flashlight that is light weight and have a light source that will last a longer amount of time over that of conventional incandescent lamps.

### ***Response to Arguments***

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention

Art Unit: 2875

where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, each prior art teaches a means of a light weight portable flashlight, the motivation to combine does not need to be from the references, but can be from known technology or one having ordinary skill in the art see MPEP 2144. The examiner has reviewed the arguments by the applicant and takes notice how the references lack motivation.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Art Unit: 2875

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. Ward whose telephone number is 571-272-2386. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on 571-272-2378. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
